Pottstown, PA 19464

To Whom it May Concern,

I am writing this letter in support of any funding that may be applied to the implementation of the Colebrookdale Railroad restoration and operational use. As a local business owner and resident of the community, I can only image the positive impact to both Boyertown and Pottstown's financial future a rail line will hold. An influx of money by both enthusiasts and passerby vacationers will help to restore our communities to the growth we have had in previous years.

Communities on both ends of the spur have an ample amount of things for families to do. By adding to and connecting Pottstown and Boyertown by rail, will only, enhance the experience others will have while visiting both communities. Offering such activities will boost economic impact to this area helping to start new businesses and grow existing ones. As a small business owner who has invested his life's saving to open and grow a local business, it would only be advantageous for all of us to see this rail line come to pass. A tourist passenger line ties in with the historic nature that many view of Pennsylvania. It will become a natural stop for many who seek relief from their busy day-to-day lives to enjoy what our communities will have to offer. Alone and separate, we will dangle in the wind and eventually fade away. Together, pooling our resources we offer much to do with an assortment of activities for everyone to see and participate in.

One by one, I have seen businesses board up and close or move away. We have an opportunity to do something and turn this around with your help. In my strongest words, I ask that all funding, at the local, county, state and federal levels expedited to make this a reality. We have something to offer for the good of all those who live and visit Pennsylvania, I hope you see the reality in this also.

Sincerely,

Joseph Fava Jr.
