

Keystone Markers

Now at Spring City Electrical

Installed over a century ago when Pennsylvania was the keystone in the arch of American progress, Keystone Markers once heralded the entrances to all Pennsylvania towns and points of interest, as well as river, creek, and trail crossings. With most locations having several Markers, each designating a separate entrance “gateway,” the Keystone Marker was once a ubiquitous symbol on the Pennsylvania landscape.

In partnership with the Keystone Marker Trust, we are proud to make historically-accurate Markers available for the first time in seventy years—made right here in Pennsylvania.

Celebrating Pennsylvania's people and places, its heritage and its future, Spring City's Keystone Markers welcome visitors in a way that is uniquely Pennsylvania and inspire pride and a sense of belonging among our citizens.

Spring City's historically-accurate Marker Signs replicate the size, shape, configuration and even the unique rear mounting details of the originals. Authentic fluted Marker Posts with integral finials replicate the classic lines, craftsmanship, and attention to detail otherwise lost to another era.

Marker text cast into the face of the Signs reproduce the typeface of the originals and “sponsorship” information can be cast into the rear. Designed to stand the test of time, your Markers will be an investment that will pay returns for a century or more.

Spring City would be proud to customize one of these noble monuments from the past for you. Significant discounts are available for multiple Markers. Place your order to 610-948-4000 or sales@springcity.com. More information about the Keystone Markers can be found at www.keystonemarkertrust.org.
